

orfix Tamper-Evident Bags for Security Packaging

Customised safety for your application – orfix tamper-evident bags are specially designed to fulfil the highest security requirements for the safe transit and storage of valuable and sensitive items.

orfix tamper-evident bags: Secure packaging solutions guarantee protection against theft and manipulation

orfix tamper-evident bags are manufactured in our own European production facilities from tear-resistant LDPE film and are available in transparent or opaque versions in virgin, recycled and Blue Angel certified film.

There are also numerous customisation options:

- ✓ Individual, customer-specific printing (6-colour printing machine)
- ✓ All barcode types and sizes up to a height of 36 mm
- ✓ Tear-off slips with barcode and number, next to and on top of each other
- ✓ Document pockets for accompanying documents
- ✓ Bottom gussets, perforation, recessed grips
- ✓ RFID transponder
- ✓ Antistatic peel-off strip

High safety standard thanks to security features on the bag

- 1 Tamper-evident seal closure tape
- 2 Various barcodes and sizes
- 3 Consecutive numbering
- 4 Firm double shrink-welded seam
- 5 Security printing along the seal seams
- 6 Tear-off slip with consecutive numbering and barcode

The orfix tamper-evident security tape levels at a glance

Our tamper-evident security tapes offer a remarkably visible VOID effect when the bag is opened by force and over a very wide temperature range - both when exposed to heat and cold. The security tape is gapless attached to the bag without edges and is also very difficult to remove thanks to the special security cuts. Our closures with thermochromic colour for visual detection of tampering attempts with high heat and water-soluble lettering offer even more security, protecting against the use of solvents and liquids. Thanks to the embossed edge, the coloured peel-off strip on the closure is easy to remove and guarantees quick and easy sealing.
